

**Tutorial Online**  
**Blok 15 – PBL 2B**  
**Angkatan 2022 Tahun Ajaran 2024/2025**

Senin, 7 Oktober 2024

Kelompok 1

The screenshot displays a Zoom meeting interface. At the top, a green banner reads "You are viewing Prasasti's 2nd device's screen". The main area is split into two sections. On the left, a Microsoft Word document is shared, showing a list of learning objectives under the heading "Learning Objective". On the right, a grid of 12 video feeds shows various participants, including Prasasti Cikaltas (095), Fannisa, and Prasasti's 2nd device (060). The bottom of the screen features a control bar with icons for Unmute, Start Video, Participants (13), Chat, Share Screen, Record, Show Captions, Breakout Rooms, Reactions, Apps, Whiteboards, and a "Leave Room" button.

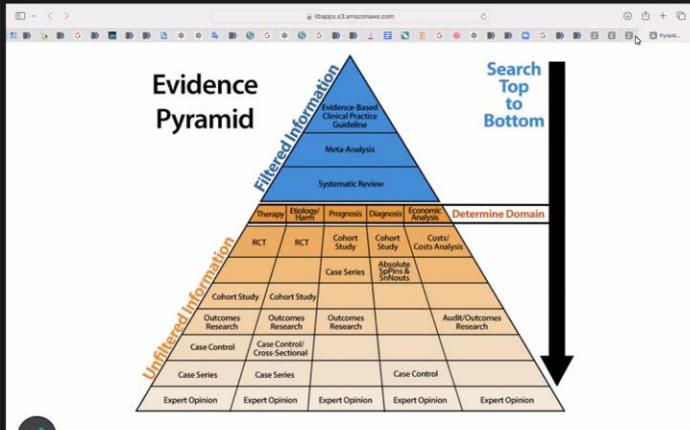

**Learning Objective**

1. Herbal material research ethics  
Can make a contribu
2. The policy of helsinki's declaration
3. The diagrams of EBD pyramid
4. Level of evidence in detail of each
5. The other priciple there are five principles (begin with the A word)
6. Ethical appraisal (main component; the validity assesment, importance assesment, appliace assesment)
7. Diagram or framework or flow about how to get the ethical clearance in UMY
8. How to make the informed consent for your research

Microsoft Word - PRISMA 2020 Checklist.doc

PRISMA 2020 Checklist

Section and Topic	Item #	Checklist Item	Location (where item is answered)
TITLE	1	Identify the report as a systematic review.	
ABSTRACT	2	See the PRISMA 2020 for Abstracts checklist.	
INTRODUCTION	3	Describe the rationale for the review in the context of existing knowledge.	
Objectives	4	Provide an explicit statement of the objectives (or questions) the review addresses.	
METHODS	5	Specify the inclusion and exclusion criteria for the review and how studies were grouped for the synthesis.	
Information sources	6	Specify all databases, registers, websites, organisations, reference lists and other sources searched or consulted to identify studies. Specify the date and range of dates searched and whether the search was limited to English or another language.	
Selection process	7	Present the full search strategies for all databases, registers and websites, including any filters and limits used.	
Data collection process	8	Specify the methods used to decide whether a study met the inclusion criteria of the review, including how many reviewers screened each record and each report retrieved, whether they worked independently, and if applicable, details of automation tools used in the process.	
Data items	9	Specify the methods used to collect data from reports, including how many reviewers collected data from each report, whether they worked independently, any processes for obtaining or confirming data from study investigators, and if applicable, details of automation tools used in the process.	
106	106	List and define all outcomes for which data were sought. Specify whether all results that were compatible with each outcome domain in each study were sought (e.g. for all measures, the points, analyses), and if not, the methods used to decide which results to collect.	
107	107	List and define all other variables for which data were sought (e.g. participant and intervention characteristics, funding sources). Describe any assumptions made about any missing or unclear information.	
108	108	Specify the methods used to assess risk of bias in the included studies, including details of the tools used, how many reviewers assessed each study and whether they worked independently, and if applicable, details of automation tools used in the process.	
109	109	Specify for each outcome the effect measure(s) (e.g. risk ratio, mean difference) used in the synthesis or presentation of results.	
Synthesis methods	110	Describe the processes used to decide which studies were eligible for each synthesis (e.g. allocating the study intervention characteristics and comparing against the planned groups for each synthesis (item #10)).	
111	111	Describe any methods required to prepare the data for presentation or synthesis, such as handling of missing summary statistics, or data conversions.	
112	112	Describe any methods used to tabulate or visually display results of individual studies and syntheses.	

Participants: 11

Jurnal

Kelebihan: basis terstruktur, pembahasan lebih detail dan terperinci, menggunakan Bahasa lugas dan ilmiah, mengikuti perkembangan ilmu pengetahuan khususnya di bidang kedokteran gigi, meningkatkan kemampuan berpikir kritis karena dapat belajar menganalisis informasi

Kekurangan: ada yang tidak bisa didownload, berbayar (karena biaya publikasi juga tinggi) keterlambatan publikasi (scopus dll) bisa hampir 2 tahun, persiapan review dan publikasi lama sehingga penelitian terbaru tidak bisa langsung diakses oleh umum, ditemukan bias publikasi yaitu kecenderungan menerbitkan jurnal peneliti Jurnal yang terpublikasi banyak, tapi tidak

2. Sample size, cara memilih sample
