

BUKTI TUTORIAL SKENARIO IN ENGLISH BLOK 3

JUMAT, 24 JANUARI 2025

1. KELOMPOK 1 – drg. Edwyn

B. PROBLEM ANALYSIS

1. What is the chief complain of this case ? (1)
2. What is the relation between orthodontic appliance and excessive saliva ?
3. What is the function of saliva ?
4. What is the mechanism of production saliva ?
5. What are classification of saliva ?
6. What is the optimal time of braces control
7. Can the excessive saliva production effectiveness oral hygiene

2. Kelompok 2 – dr. Ovi

TUTORIAL CBL 1 BLOK 3

A 24 years old female came to a dentist for her braces control after she had been used it for a week. She complained about her excessive saliva and she felt uncomfortable.

1. The dentist said that condition was a normal reaction. Determine the problem
2. Analyze the problem
3. Draw conclusion
4. Set Learning Objective
5. Collecting information
6. Present the results of information

A. Determine the problem

1. what does the patient suffer from
2. what is fever?
3. why is fever an immune system response (mechanisms, symptoms)
4. how can fever happen
5. what are the etiology of this condition
6. why is this patient cannot swallow solid food
7. why is the body temperature of 38.5 degree an important sign of the diagnosis of the infection
8. how is the pathophysiology of the painful
9. does days affect the worst of the infection
10. what is the collection between painful swallowing and fever
11. How is mechanism of normal swallowing

B. Analyze the problem

1. what does the patient suffer from
 - Irradiation/swallowing
 - fever, painful while swallowing (odynophagia)/dysphagia, unable to swallow solid food
2. what is fever?
 - Common observational evidence to infection.

3. Kelompok 3 – drg. Iksanudin

Google Docs interface showing a sharing dialog box for a document titled "Dokumen tanpa judul". The dialog box is open, displaying the document's name and a list of people with access. The "Orang yang memiliki akses" section shows "maufidzahfa a (you)" as the owner. The "Akses umum" section shows "Siapa saja yang memiliki link" as the access level. The dialog box has buttons for "Salin link", "Link disalin", and "Selesai". The background shows a grid of video thumbnails from a Zoom meeting, including participants like 005_Callysta Nesha P.K., 013_Maufidah Zalfa, 004_Rey Dhea, 008_Nasywa Annuru, 007_Syarifah Badawiah, 006_Muhammad Rafli As, 012_R Elsa Nurega, 009_Shofti Zalfa Bakti, 001_Muthia Nazhifah, and Iksanudin. The bottom of the screen shows a Windows taskbar with a search bar and various application icons.

4. Kelompok 4 – drg. Ika

Zoom meeting interface showing a presentation slide titled "Identification of problem" and "Problem analysis". The slide content includes a list of questions related to excessive salivation. The Zoom interface shows a grid of video thumbnails from a meeting, including participants like 020_Hanifa Laila Choirun..., 024_rizky zahfarina ra..., 023_Nimas Ajeng Triya..., 018_Deswita soewandi, 021_fahima arifah, 016_aksa sumaringgah, 014_Adinda Ris..., and 014_Adinda Risma. The bottom of the screen shows a Windows taskbar with a search bar and various application icons.

5. Kelompok 5 – drg. Nia

The screenshot shows a Zoom meeting interface. The main window displays a presentation slide titled "Saliva" with the following text:

Saliva is a fluid in the oral cavity composed of 98% - 99% water, while around 2% is composed of organic components, inorganics, electrolytes, mucus, antimicrobial substances, and various enzymes.

there are two types of saliva, namely glandular saliva derived from salivary glands and whole saliva. Whole saliva is a mixture of fluids derived from salivary glands, gingival sulcus, oral mucosal transudate, mucus from the nasal cavity and pharynx, oral bacteria, food debris, desquamated epithelium, blood cells, and a small portion of drugs and chemical products.

Excessive saliva: Excessive saliva, or hypersalivation, is when your mouth produces too much saliva. It can be caused by conditions like acid reflux, pregnancy, infections, or certain medications.

IDENTIFICATION OF PROBLEMS

1. What happen of saliva glands are damage?
2. What is hypersalivation and how does this condition occur?
3. What are the classifications of saliva?
4. Name and explain the stages of salivary gland formation
5. What is the function of saliva
6. What is the relationship between saliva and braces
7. Is hypersalivation in braces users permanent or temporary?

The right side of the screen shows a grid of participants, including:

At the bottom, there are icons for Audio, Video, Participants (13), Chat, React, Share, Apps, Record, Breakout rooms, More, and Leave room. The system tray shows the time as 1:22 PM on 1/24/2025.

6. Kelompok 6 – drg. Tami

The screenshot shows a Zoom meeting interface. The main window displays a presentation slide titled "SCENARIO IN ENGLISH" with the following text:

A 32 years old female came to a dentist for her braces control after she had been used it for 6 weeks. She complained about her excessive salivary and she felt uncomfortable. The dentist said that condition was a normal reaction.

Define the Problem

1. Definition of saliva?
2. What is the classification of saliva?
3. What is the relationship of saliva to Braces?
4. What is the function of salivary glands?
5. How is the process of saliva formation?
6. What are the types of salivary glands?
7. What causes excessive salivation?
8. What are the composition of saliva?
9. What are the abnormalities of salivary glands?
10. What is the role of various types of salivary glands in producing hypersalivation in conditions like this?

The right side of the screen shows a grid of participants, including:

normal reaction.

PROBLEM ANALYSIS

1. What is definition of saliva?
2. What is the function of saliva?
3. What are the compositions of saliva?
4. What are the classification of saliva?
5. What is the process of releasing saliva?
6. What are the causes and effect of hyposaliva?
7. Various types of glandula salivas?
8. Any substance produce by the saliva glands?
9. Why is there excessive saliva when first using braces?
10. Various types of glandula salivas?
11. How to reduce hypersalivation?

B. Analyze Problem

1. What causes Excessive saliva?
2. What is saliva?
Saliva is a clear fluid produced by the salivary glands, in the mouth. This fluid may seem simple, but it plays a very important role in maintaining the health of our mouth and bodies.

9. Kelompok 9 -drg. Zuvan

The screenshot displays a Zoom meeting interface. The central window shows a Microsoft Word document titled "SCENARIO IN ENGLISH - Saving...". The document content includes a list of 13 questions under the heading "A. Define the problem". The questions are:

1. What is the definition of saliva
2. What is the composition of saliva
3. What is the function of saliva
4. Mechanism of saliva secretion
5. What are the type of saliva
6. What is the role of saliva to maintaining oral health
7. Where does saliva come from
8. What is the relationship between saliva and braces
9. Why is the patient has more saliva while she use braces
10. What the reason the dentist said
11. What is the function of braces
12. Does the use of braces interfere with saliva production
13. What is the main reason why people chose to use braces

The right sidebar shows a grid of 12 participants, including:

Document - Word

Paragraph

2. What is the composition of saliva?

Saliva is composed of a variety of electrolytes, including sodium, potassium, calcium, magnesium, bicarbonate, and phosphate. Also found in saliva are immunoglobulins, proteins, enzymes, mucin, and nitrogenous products, such as urea and ammonia. These components interact in related function in the following

General areas: (1) bicarbonates, phosphates, and urea act to modulate pH and the buffering capacity of saliva; (2) macromolecule proteins and mucins serve to cleanse, aggregate, and/or attach oral microorganisms and contribute to dental plaque metabolism; (3) calcium, phosphate, and proteins work together as an antibacterial factor and modulate demineralization and
